

Mangolia and Line of Force of Magnetic Fields in the Traditional House GER

Erdene Adiyasuren

Mongolian University of Science and Technology, Ulaanbaatar 14191, Mongolia

Abstract: There are several patterns to indicate the name of our nation, for example, Mangol, Mughal, Mogol, Mongol. In the world historical documents, the name of the Mangolians mentioned from VII CE. That means the name of our nation as Mangolians has been listed in the ancient historical documents from the VI-VII CE. The real name of our nation is Mangolia. Fortunately, we have great heritage on this way of searching the real name of the nation. There is a seal in ancient letter from the Great Khaan of our nation to the Pope of Rome. French scientist recognized that this seal is the seal of great King or Khaan of Mangolia. The traditional house GER is very particular due to its structure and construction. One thing must be warned to construct the GER is that the entrance door should be oriented due south of the earth. This means that the line of force of world magnetic field must be entered from the entrance door of the GER. The person who is resting at night in the GER should point his/her head in due north. The line of force of magnetic field of earth must be entered through the entrance of the GER.

Key words: Mangol, Mughal, Mogol, Mongol, GER, due south, due north, line of force of magnetic field, magnetic field of a man, magnetic field of globe or earth.

1. Introduction

1.1 The Name of Our Nation

There are several ways to indicate the name of our nation such as Mangol¹, Mughal², Mogol [1], and Mongol³. There are so many explanations or spellings on these names.

In this paper, the name of our nation can be used as both Mangolia and Mongolia.

The meanings on the name of the Mangol:

- (1) We are main or nucleus;
- (2) Our country is basic;
- (3) Our country is major.

The meanings on the name of the Mughal:

- (1) In 1526, Mangolians came in India and established “Great Mughals” state.

The meanings on the name of the Mogol:

- (1) The famous scientist Igor de Rachevilles, in his

article “The Names of the Mongols in Asia and Europe”, wrote that “in the XII-XIII centuries, in the Central and Western Asia, as well as in Europe, were called Tatar (Tartar) or Mogol (Moyol)”.

The meanings on the name of the Mongol:

- (1) “MON” is name of a river;
- (2) Name of a man;
- (3) Immortal fire.

The most valuable heritage of our nations who established Mangolia nation was THE SEAL OF MANGOL EMPIRE in the letter which was sent from the Guyug Khaan (1206-1248) to the Pope of Vatican in XIII century.

In the world historical documents, the name of the Mangolians mentioned from VII CE.

That means the name of our nation as Mangolians has been listed in the ancient historical documents from the VI-VII CE.

Corresponding author: Erdene Adiyasuren, lecturer, research fields: power supply and renewable energy utility.

¹ The seal which was stamped in the letter of Great Mangolian Khaan Guyug to the IV Innocent Pope of Vatican, XIII century, Vatican.

² In 1526, the Mangolian Khaan Babur established “Great Mughals” state in India.

³ Mangolian scientist Sagan tsetsen, “Erdeniin Erkhii”, XVII century.

Here is explanation of singular and plural form of nouns in ancient Mangolian language.

Doctor M. Saruul-Erdene explained the singular and plural form of the noun “YEAR” by using ancient Mangolian language historical document which was sent to France.

In 1305 (Islam 704), the Khaan Ulziit of Mangolia sent a letter to the king Philip of France. The “ON” (it means year in English) in the singular form of Mangolian language was written “OD” which is plural form in this letter [2]. The “ON” or “OD” means “YEAR” in English.

Mangolians have so many valuable documental heritages like as “Secret history of Mongolia”.

MANGOL is in singular form and MANGOD is plural form in ancient Mangolian language.

It is able to find MANGOD in the “Secret History of Mongolia” [3].

1.2 The Line of Force of the Magnetic Field in the GER

The GER is very simple to build and to transport.

One thing must be warned to construct the GER is the entrance door should be pointed in due south of the earth geographical pole [4].

This means that the line of force of world magnetic field must be entered through the entrance door of the GER.

The person in GER should be rested at night and his/her head pointing in due north of globe.

2. The Real Name of the Nation and Line of Force of Magnetic Fields in the GER

2.1 Searching and Finding the Real Name of the Nation

Everyone knows the name of our nation as Mongolia. Many people of our nations believe that the name of our nation is Mongolia.

But some people do not believe it and search the real name of our nation.

Fortunately, we have great heritage on this way of searching the real name of the nation.

Polish scientist Kirill Karelevskii found a letter which

was kept in the secret archive of Vatican in 1920.

This letter in Persian was sent from the Great Khaan Guyug of Mangolia to the IV Innocent Pope of Rome in XIII century.

In this letter, Kirill Karelevskii noticed an unknown seal and he could not understand what it is.

But French scientist Pelliot could read and recognized what it is and it was a seal of the Great Khaan of Mangolia.

This seal might be used by the Great Khaan Chinggis of Mangolia.

Fig. 1 General location of the household furniture in the GER.

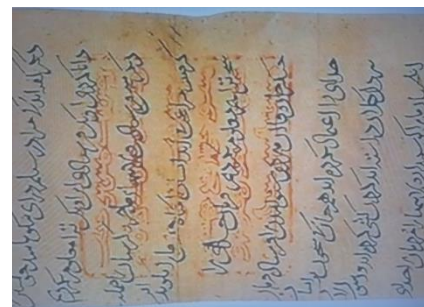

Fig. 2 Letter in Persian which was written by GUYUG KHAAN.

Fig. 3 Seal of the GUYUG KHAAN letter.

Now it is able to find the name of the nation in this seal.

This figure was written the name of our nation in script ancient Mangolian letter.

Let's explain it in a detail by each letter.

Fig. 4.a Name of nation Mangolia in the seal.

Fig. 4.b This is letter consonant "M".

Fig. 4.c This is letter vowel "A".

Fig. 4.d This is letter consonant "NG".

Fig. 4.e This is letter consonant "G".

Fig. 4.f This is letter vowel "O".

Fig. 4.g These are letters "G, O, L".

According to letters were written in the seal, it is able to spell the name of our nation.

The name of our nation is "MANGGOL or MANGOLIA".

It is sure that the name of our nation is not "MONGOLIA" because the letter "O" does not exist in first syllable in ancient script.

Now let's explain the meaning of this name "MANGOLIA" in English.

"MAN" in Mangolian means "WE and OUR" in English.

"GOL" in Mangolian means "MAIN, BASIC, MAJOR, CENTER and RIVER" in English.

Finally, the real name of our nation is "MANGOLIA" or "WE ARE MAIN".

2.2 Lines of Force of Magnetic Fields of Globe and Man Are in Same Direction Inside of the GER

The line of force of magnetic field of a man is mentioned by two patterns as like as followings.

According to these patterns the outer line of force for first figure is oppose to the line of force of earth magnetic field while for second figure is same as line of force of earth magnetic field.

If the line of forces of two different magnetic field are the same, in that case these two magnetic field must be excited [5].

In the GER, the force of earth's magnetic field and the man's magnetic field are the same if he rests at night by pointing his head in due north, because the entrance door of GER must be pointed in due south of the globe. In this case they can have the most relax even night sleep.

The man's magnetic field must be related with the magnetic field of earth. Or the man's magnetic field must be refreshed, excited or renovated by the earth magnetic field.

If the lines of forces of two different magnetic fields are oppose to each other, these fields can be decreased and weakened.

In case of a man, if his line of force of magnetic field is opposes to line of force of earth magnetic field, he cannot take a rest or relax.

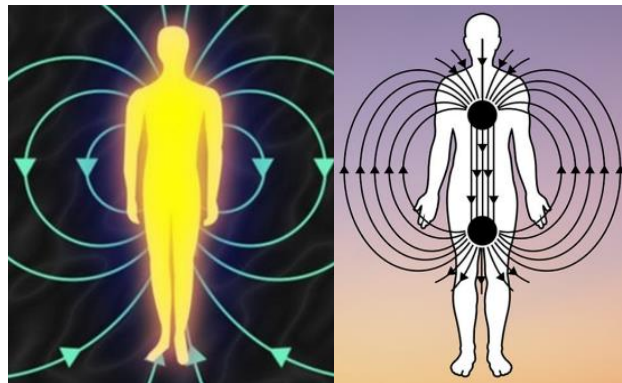

Fig. 5 The man's magnetic field and its line of force.

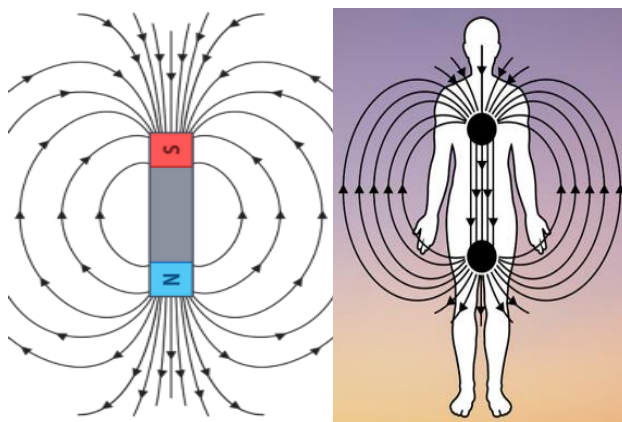

Fig. 6 Direction of line of forces of the earth and of a man are the same to rest even at night in the GER.

It is unwritten law if the man rests at night in the GER, he needs to point his head in North Pole of globe.

3. Conclusions

The name of our nation is “MANGOLIA”.

The value able heritage which includes the real name of our nation is the seal in the letter which was sent by the Great Mangolian Khaan Guyug to the IV Innocent Pope of Rome in XIII CE.

It is sure that the name of our nation is not “MONGOLIA” because the letter “O” does not exist in first syllable in ancient script of the name of our nation in the seal of the Great Khaan Guyug.

If a man rests in the GER, the line of forces of the

magnetic fields of a man and the earth can be in a same direction.

The magnetic field of a man who rested in the right constructed GER will be excited and maintained by the magnetic field of the earth.
